Smoothed correlations

Correlation matrix of 30 variables, showing smoothed correlations. The matrix is symmetric, with the diagonal elements all equal to 1.0. The variables are grouped into two sets of 10 variables each. The first set (top-left) shows a block-like structure, while the second set (bottom-right) is more noisy.

Correlation matrix of 30 variables, showing smoothed correlations. The matrix is symmetric, with the diagonal elements all equal to 1.0. The variables are grouped into two sets of 10 variables each.
